

Converter RS232/TTY

Part-No.: 764856

The converter enables the galvanic isolation of the interfaces between the fire alarm control panel (FACP) and an external device.

The converter can be installed in the IQ8Control FACP at the mounting point of an esserbus transponder (small model) or in a suitable housing on a hat rail or on a C-section rail. Another option is to install it on the PSM's mounting plate (Part No. FX808333) in the FlexES Control FACP, for example.

Features:

- Galvanic isolation TTY input / RS 232 output

Operating voltage	9 ... 30 V DC
Ambient temperature	-10 °C ... 50 °C
Type of protection	IP 40 (With housing)
Weight	approx. 20 g
Dimensions	W: 65 mm H: 72 mm D: 20 mm
