

Weather protection housing for detector

**Part-No.: 781465**

The weather protection housing is used as covering protection for Venturi Air Duct Detector. When the detector is mounted in places where possible condensation problems could arise, e.g. in cold attics or outdoor, use 781465 to avoid condensation of hot outlet air. can be subsequently fixed above the already mounted air duct module UG7.

Type of protection

IP 54
